Meade Lightbridge 8", 10", 12", and 16" primary and secondary collimation knobs

These replace factory screws so that collimation of both primary and secondary mirrors can take place without tools. We also offer stronger primary mirror support springs for the Lightbridge that will not sag like the factory springs.

Primary mirror collimation knobs, including locking knobs, for the Lightbridge 8", 10", and 12" are available for US\$29.95 per set. These models each require different primary knobs, so be sure to specify aperture in your order. (The Lightbridge 16" already has factory-installed primary mirror collimation knobs.) Secondary mirror collimation knobs that can be installed on the 8", 10", 12", or 16" Lightbridge are available for \$20.95 per set. Stronger primary mirror support springs for the Lightbridge 8", 10", and 12" are available for \$16.95 per set.
